The Highly Trained U.S. Marine Veteran Behind ZevaTek

Company co-founder Miguel Funes was an active-duty United States Marine. While in service, he learned to manage people under the most stressful circumstances. For over 15 years, he has refined his operational planning, strategy development, and management skills while working in the private sector and public sector. Miguel is a certified project manager under the Project Management Institute and a certified chief information officer with executive-level leadership education under the International Academy of CIO. He holds a master's degree in Technology Management and a bachelor's degree in Information Systems and Operation Management from George Mason University.

Zeva is a leading services provider for advanced cloud and systems architecture, identity, credentialing, and access management (ICAM), cybersecurity technology, and public key enablement. Throughout its history, Zeva has been helping clients around the globe strengthen their security posture and address complex identity, cryptography, and enterprise IT security challenges. Zeva's subject matter experts and thought leaders have created a solution that helps federal agencies and commercial corporations increase their efficiency and return on investment for their Public Key Infrastructure (PKI).

Founded in 2005 in Northern Virginia, Zeva Inc. is an ISO 9001, ISO 27001, ISO 20000, CMMI Level 3, Woman-Owned Small Business. Demonstrating its product innovation, Zeva holds multiple patents for encryption and decryption technologies.

SevenTek is a trusted IT company. SevenTek is a service-disabled veteran-owned small business dedicated to creating flexible solutions for its clients worldwide. You can count on us to transform a legacy IT shop into a revenue engine by employing a technical approach that caters to each organization's specific requirements. Our team are experts in a wide range of IT implementations like cloud technologies, data center, and more.

We hold a variety of certifications. We are certified Project Managers, Cyber Security, and cloud certified.

Benefits & Qualifications

ZevaTek's experienced and accredited team of subject matter experts provides customer-centric focus by utilizing their deep understanding of the complex challenges they face.

Accredited Team

Zeva is a Microsoft Application Development Gold partner with a team holding several accreditations, including Azure Developer Associates, Azure Administrator Associates, and Azure Solutions Architect Experts.

Years of Quality Service

Our team of subject matter experts has successfully delivered solutions to help federal agencies and corporations around the globe address complex challenges and mission-critical objectives during our years in business.

Agile Small Business

Our team works efficiently to deliver reliable, high-quality, and agile projects that are fully optimized and result in substantial cost savings.

Best-in-Class

Zeva continuously strives to increase service quality levels and is certified in ISO 9001 for Quality Management, ISO 27001 for Information Security Management, ISO 20000 for IT Service Management, and CMMI level 3 for Development and Services for process maturity.

Award-Winning Experts Staff

Our team is experts in a wide range of IT projects like cloud technologies, data centers, and more. Our staff is award-winning managers recognized for their superb attention to detail in successfully fulfilling the technology needs of large and small organizations.

Our Services

Our collaborative team of elite subject matter experts applies their extensive experience and knowledge to address our clients' needs and deliver exceptional value. We provide tailored services for identity, credentialing, and access management (ICAM), cloud and systems architecture, cybersecurity technology, remote access technology, IT project management, Logistic project management, and custom software development at a best-in-class service level from a robust and agile small business.

Cloud & Systems Architecture

Advanced systems architecture is a defining element to achieve efficiency, effectiveness, scalability, and system security. Our team of accredited engineers and systems architects deliver customized services that exceed client expectations, tackling technical requirements with cutting-edge cloud and virtualization solutions. Our services cover the entire System Develop Life Cycle "SDLC" addressing its various stages, including Development Modernization and Enhancement (DME), Operations and Maintenance (O&M), Systems Engineering and Administration, and tailored systems architecture.

Cybersecurity Technology

Our team has provided federal agencies with cybersecurity services that support critical federal workloads, harden security measures, and position systems to operate on government production networks while being secure and within compliance. ZevaTek's support allowed notable federal agencies to be the first to achieve Continuous Diagnostics and Mitigation (CDM) program compliance in the U.S. government. Moreover, ZevaTek's staff has been recognized for its exceptional cybersecurity performance in the federal space and honored with a federal agency's Commissioner's Award for Excellence.

IT Project Management

We take a tailored project management approach to ensure flexibility and agility on project implementation while ensuring all project constraints are met. Our certified technical project managers will provide the business and technical insights necessary to ensure decisions are made in cohesion with the business vision and strategies.

Remote Access Technology

Our team can design solutions from the ground up or utilize existing infrastructure to deliver an optimal end-user experience. We can also implement and hand off remote access solutions, VPN, RDP, and third-party solutions and perform end-to-end security testing and verification.

Identity, Credentialing & Access Management

The need to authenticate and use identities securely has grown exponentially during the past years and was further catalyzed by COVID-19. How your identity is defined, assured, issued, and consumed affects its efficiency, scalability, security, and flexibility. ZevaTek services are designed to aid federal agencies to increase public key infrastructure efficiency, achieving Continuous Diagnostics and Mitigations (CDM) compliance, expanding usability and efficiency of their HSPD-12 identities, and assessing, integrating, and administering their physical and logical access systems.

Custom Software Development

The software engineering team at ZevaTek is ready to help your organization stay ahead of the competition by serving as your trusted technology advisor and developing software to meet your unique needs. We have 16+ years of experience specializing in identity credentialing and access management, cybersecurity, cryptography, and systems architectures. Our team has successfully developed several software products that are in use globally by multiple government agencies and Fortune 500 companies.
